

AI Salon Pro — Demo Day Cheat Sheet

One-page presenter guide. Numbers assume demo staff rates (50/60/40%); with real staff, splits follow their real commission settings.

- 1. Manager Dashboard** — Open with the four live cards: **6 appointments** · **\$215 revenue** · **2 on duty** · **4.3 rating**. "Every card is clickable."
- 2. Click Today's Appointments** — Summary chips → John Doe's 9 AM ticket with **two services, two techs** → walk-ins tracked separately (Amy \$60 done, Tom \$15 cancelled) → per-service totals → which staff did which clients → bottom line: **2 walk-ins + 4 booked = 6 total**.
- 3. Click Today's Revenue** — The money shot: John Doe's \$85 ticket = **\$35 @ 50% + \$50 @ 60%** — "two techs, one client, exact to the penny." Per-staff split table (**\$120.50 staff / \$94.50 salon**), per-service revenue %, walk-in vs booked revenue.
- 4. Click Staff On Duty** — 2 clocked in (8:55 / 9:05 AM), live hours, per-person sales. "Syncs from the Staff page time clock within seconds."
- 5. Click Avg Rating** — The math spelled out: **(5+4+3+5) ÷ 4 = 4.25 stars**, distribution bars, per-staff averages, every client comment explaining the number.
- 6. Sidebar → Schedule** — Status chips, duty board (mark late / sick / vacation / called-off; auto-late after 15 min past shift), day/week/month/year earnings per tech, one-click recurring shifts.
- 7. Sidebar → Reports** — Daily report = full breakdown; weekly / monthly same detail by range; **Export to CSV** = one row per staff share. "Same numbers everywhere — one shared data layer."
- 8. Admin Page** — Manager submits closeout (PIN **1111**) → Admin Closeout Records → **View**: identical splits. Payroll: same \$215 / \$120.50 / \$94.50. Tax Center matches at year-end.

Numbers to Expect

What	Where	Expected
Today's appointments	Dashboard card	6 total (4 completed, 1 pending, 1 cancelled)
Revenue split	Revenue card	\$215 = \$120.50 staff + \$94.50 salon
Walk-ins vs booked	Appointments / Revenue drill-down	2 walk-ins (\$60) + 4 booked (\$155)
Multi-staff ticket	Revenue → first transaction	\$85 = \$35 @ 50% + \$50 @ 60%
Average rating	Rating card	(5+4+3+5) ÷ 4 = 4.25
Staff on duty	Staff card	2 clocked in
PINs	Closeout / login	Manager 1111 · Admin 0000

Cleanup & Reload

Clear demo: Manager dashboard → Clear Demo (or Admin → Data & Backups → Remove Demo Data). All 16 demo records vanish; real data is never touched.

Reload anytime: double-click seed-demo-day.html in the project folder, or the Demo Day button on the Manager dashboard.
