Staff PINs & security

- Only Admin can set or reset Manager/Admin PINs.
- Log out everywhere when you step away — one tap locks all.

2 · MONEY PANELS (FRONT DESK DASHBOARD)

- Revenue Today — live day total, checkouts, avg ticket, top services. Unlock with your PIN; techs see only a lock.

- Payroll This Week — live estimate per tech:

commission on completed sales, hourly + overtime.

- Both refresh every 30 min from the shared system.

3 · PAYROLL (WEEKLY ROUTINE)

- Check the week's estimate on the Payroll widget any time.
- End of week: Manager page → Payroll → review per-tech

numbers (sales x commission, or clocked hours x rate).

- Save the run, pay the team, then Mark Paid — saved runs

and archives are permanent for taxes (W-2 / 1099).

4 · DAILY CLOSEOUT

- Finish all checkouts on the Scheduler first.
- Manager page → Closeout → verify cash vs card totals, submit — Admin receives it; records are archived forever.

- Compare with Revenue Today on the dashboard — they

should match. Differences usually mean an open ticket.

5 · STAFF & PINS

- Add staff: Admin/Manager → Staff → name, role, 4-digit PIN.
- Roles: admin, manager, receptionist (Scheduler access), nail tech (own schedule only). Pay type: commission or hourly.
- Reset a PIN: Admin page → staff list → new PIN — the old one stops working on every page instantly.

- Deactivate (never hard-delete): history, appointments,

and payroll stay archived and searchable forever.

6 · REPORTS, INVENTORY & CLIENTS

- Manager page → Reports: revenue, top services, tech performance — every table exports to CSV.

- Inventory: polish-level alerts show before you run out.

- Client list: visit history, totals, notes — searchable

from any staff page header. Admin exports full backups

(JSON) — grab one monthly to a USB drive.

7 · DEMO DAY (TRAINING MODE)

- Manager page → Demo Day loads a full fake day: appointments, reviews, clock-ins — great for training.

- Everything demo is tagged: Remove Demo Data wipes it
